About company

Antmicro is a software-driven tech company developing modern edge AI systems for various branches of industry. We provide applied R&D for customers worldwide, offer assistance in prototyping, new product development and adoption of modern embedded technologies both in the hardware and software areas. Our projects involve a broad range of open source technologies such as RISC-V, Renode, Zephyr, TensorFlow, ROS, Linux and Android. Antmicro is a Strategic Founding Member of RISC-V International as well as a member of the Linux Foundation, Zephyr Project, CHIPS Alliance and OpenPOWER Foundation. We believe in the power of open source to transform entire industries and we build our identity and business model around it.
